MOHAMAD FIKY BA'DAFITRO

Jakarta, Indonesia • linkidnmohamadfiky@gmail.com • +62 857-4094-838 • linkedin.com/in/mohamad-fiky • portfolio-fiky.vercel.app

PROFESSIONAL SUMMARY

Undergraduate Information Technology student specializing in Full-Stack Web Development, System Design, and Modern Software Architecture. Experienced in structuring modular applications, defining clean client-server boundaries, and leveraging AI-assisted engineering tools to accelerate delivery cycles while maintaining code quality. Proficient in TypeScript, React, Next.js, and Node.js with solid database design experience using PostgreSQL, MySQL, and Prisma ORM.

EDUCATION

Universitas Esa Unggul — Jakarta, Indonesia

Bachelor of Science in Information Technology (Informatics) — *Expected Graduation: 2028*

Current GPA: 3.88 / 4.00 (Semester 4) | *Relevant Coursework:* System Design, Software Architecture, Web Programming, Database Systems, Data Structures & Algorithms.

TECHNICAL SKILLS

Architecture & System Design: Software Architecture, System Design Principles, Modular Design, RESTful APIs, Clean Separation of Concerns.

Frontend Development: TypeScript, JavaScript (ES6+), React.js, Next.js, Tailwind CSS, Responsive Web Design.

Backend & Databases: Node.js, Express.js, PostgreSQL, MySQL, Prisma ORM.

AI-Assisted Engineering: AI-Driven Code Generation, Accelerated Debugging, Prompt Engineering for Refactoring, AI Agent Integration.

Developer Tools & Platforms: Git, GitHub, Postman, Docker, Sanity CMS, Clerk Auth, Midtrans, Xendit, Vercel.

TECHNICAL PROJECTS

Full-Stack E-Commerce Platform — Next.js, TypeScript, Tailwind CSS, Sanity CMS, Clerk, Xendit

- Architected end-to-end system flows ensuring strict decoupling between CMS content, secure payment pipelines, and business logic.
- Utilized AI-assisted engineering workflows to rapidly prototype schema definitions and optimize reusable UI components.
- Implemented user authentication with Clerk, headless content management via Sanity, and integrated Xendit for automated checkout flows.

AI-Integrated Dashboard & System Architecture — React.js, TypeScript, Tailwind CSS, REST APIs

- Designed a modular, scalable architecture separating presentation layers from state management and API services.
- Integrated AI agent endpoints to process background analytical queries and render real-time interactive telemetry.
- Employed AI tooling to accelerate edge-case handling, improve test coverage, and enforce strict TypeScript typings.

Interactive Responsive Web Application — JavaScript (ES6+), Tailwind CSS, Modular Architecture

- Engineered mobile-first application interfaces with structured data flow and optimized client-side rendering speed.
- Applied AI-driven code refactoring for cross-browser reliability and performance optimization.

ORGANIZATIONAL EXPERIENCE

ROCHI Organization — Universitas Esa Unggul — 2024 – 2026

Secretary — *Jakarta, Indonesia*

- Supervised institutional correspondence, documentation workflows, and operational archives for university-level activities.
- Facilitated inter-division synchronization to ensure project milestones and event schedules were met punctually.

LANGUAGES

Indonesian: Native / Bilingual | **English:** Limited Working Proficiency (Passive Technical Documentation / Basic Speaking)
